

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on March 29, 2010 has been entered.

Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance: A method for detecting at least one chemical species related to the chemical in which there is provided a metal surface and fluid suspected of containing the at least one of the chemical and the related species and if present in the fluid, releasing the at least one of the chemical and related species from the fluid into a gas phase is not found in the prior art. The prior art of record to Chan is the closest prior art but does not teach, disclose nor suggest a method in which if present in the fluid, there is at least one of the chemical and the related species from the fluid into the gas phase. Nowhere in Chan is it disclosed or suggested the phase of the chemical and its related species in which it is in the gas phase, neither is there suggested the exposed metal surface is exposed to a

gas phase. Chan discloses a liquid phase nor 'releasing the at least one of chemical and related species from the fluid into the gas phase'.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
